

Bayview Farm and Garden

Fruit and Nut tree varieties for the 2022 season

Bayview Farm and Garden offers a broad range of fruit and nut trees for the home garden or orchard. Availability is limited and subject to change at any time.

All fruit and nut trees will be healthiest and produce best in full sun and with regular water. Well maintained and properly sited fruit and nut trees produce better with fewer disease and pest problems. Bayview recommends using **EB Stone Organics Sure Start** in combination with **EB Stone Organics Planting Compost** at planting time, followed up with **EB Stone Organics Citrus & Fruit Tree Food**.

Available bare-root (BR) Available in containers (C)

APPLE:

Apple trees need to be pollinated by almost any other variety planted nearby. Gravenstein, Red Gravenstein and King are not pollinizers and will require a third tree. Combo trees have multiple pollinizers grafted on one tree and are fine as solitary trees.

Approximate mature height: Semi-Dwarf (M-106) 10-15', Dwarf (M-26) 8-10', Mini-Dwarf (M-27) 6-9'. Mature height can vary with each variety.

- **4-Way Combo (4-5 varieties)** Spartan, Honeycrisp, Chehalis, Akane, Liberty. Semi Dwarf (BR)(C).
- **Espalier Combo 3 tier** Akane, Honeycrisp, Liberty. Dwarf (BR)(C).
- **Akane** Red 'lunch box' type. Dessert quality. Good scab and mildew resistance. Late Aug to Sept. Semi-Dwarf (BR); Dwarf (BR).
- **Beni Shogun Fuji** Crisp juicy red apple ripens 1 month earlier than Fuji. September. Semi-Dwarf (BR)(C).
- **Bramley** Green/yellow. Scab and mildew resistant. Good cooking apple can be eaten fresh. Early October. Semi-Dwarf (BR).
- **Cosmic Crisp** Amazing red juicy apple perfect sweetness and tartness and great for storing as well. Excellent eating apple. Honeycrisp x Enterprise. Scab resistant. September. Semi-Dwarf (BR)(C); Dwarf (BR)(C).
- **Enterprise** Dark red. Vigorous and productive Considered immune to scab. Good mildew resistance. October. Semi-Dwarf (BR)(C).
- **Granny Smith** Large, late, green, all-purpose. Crisp, tart, excellent keeper. Good pollinizer. Semi-Dwarf (BR).
- **Gravenstein** The classic. Red stripes on yellow. Firm, crisp and juicy. Great for cider and pies. September. Semi-Dwarf (BR)(C).
- **Honeycrisp** Big all-purpose red apple that is crisp and juicy. Sept-Oct. Semi-Dwarf (BR)(C); Dwarf (BR).

- **King** Large yellow with red striping. Good for eating fresh, cooking or storing. October Semi-Dwarf (BR).
- **Liberty** Red, crisp and juicy. Excellent disease resistance. October. Semi-Dwarf (BR)(C); Dwarf (BR)(C); **Mini-Dwarf** (BR).
- **Northpole** Columnar form Large red. Early September good all purpose. Semi-dwarf (C).
- **Pink Lady (Maslin)** Earlier variety of the popular Pink Lady. Large, crisp, sweet tart. Pink blush, yellow skin. September. Semi-dwarf (BR).
- **Red Gravenstein** Large, red, firm flesh. Late September. Semi-dwarf (BR).
- **Scarlet Sentinel** Large yellow with red blush. Juicy sweet, late September, good keeper. Semi-dwarf (C).
- **Spartan** Dark red, crisp, excellent flavor with good storage. Heavy bearing. Late September. Excellent disease resistance. Semi-dwarf (BR). **Mini-Dwarf** (BR).
- **Sunrise Magic** Pink red, sweet, moderate acidity. Splendour x Gala. Dwarf (BR).
- **Evereste Crabapple**. Pretty ornamental with 1 inch edible red crabapples. Excellent pollinator for other apples and superb disease resistance.

PEAR and QUINCE

Like Apples, Pears need a pollinizer tree of a different variety planted nearby. Any two varieties on our list will pollinate each other. Quinces are self-fertile. Combo trees have multiple pollinizers grafted on one tree and are fine as solitary trees.

Approximate mature height: Semi-Dwarf (OHxF 97) 14-18', Dwarf (OHxF 87) 12-16'.

Mature height can vary with each variety. Asian pears tend to stay smaller.

- **4-way Combo European (up to 6 varieties)** Bartlett, Flemish Beauty, Red Bartlett, Rescue, Anjou, Bosc. Dwarf (on quince) (BR)(C).
- **4-way Combo Asian (4-5 varieties)** Chojuro, Nijisseiki, Shinseiki, Shinko, Kosui. Dwarf (on quince) (BR)
- **Espalier Combo 3 tier European** Bartlett, Bosc, Red Clapps. Dwarf (on quince) (BR)(C)
- **Bartlett European** Medium-large Very sweet, tender. Excellent eating and canning. Early Sept. Semi-Dwarf. (BR)(C).
- **Chojuro Asian** Medium, round, brown skin, crisp sweet spicy and aromatic. September. Semi-Dwarf (BR).
- **Hosui Asian** Medium, brown, crisp, and sweet. Early September. Semi-Dwarf. (C).
- **Kosui Asian** Medium large, yellow russeted, tender, sweet, spicy, aromatic. September. Semi-Dwarf. (BR)
- **Nijisseiki (20th Century) Asian** Medium round, greenish yellow, crisp, and juicy, keeps well. August. Semi-Dwarf. (C)(BR)
- **Orcas European** Yellow blushed, large sweet and flavorful, good for canning or eating fresh, excellent scab resistance, September. Semi-Dwarf (BR)(C); Dwarf (BR).

- **Red Bartlett European** Like Bartlett except bright red and sweeter. Semi-dwarf. (BR)(C).
- **Rescue European** Yellow blushed, very productive and scab resistant, juicy and sweet. Late August. Semi-Dwarf (C); Dwarf (BR)(C).
- **Shinko Asian** Brownish green, crisp rich and sweet. Semi-dwarf (C).
- **Shinseiki Asian** Medium round, yellow, crisp, and juicy. Semi-dwarf. (BR).
- **Orange Quince** Large yellow fruit with orange tinted flesh. Turns red when cooked. Semi-dwarf. (C).
- **Pineapple Quince** Medium sized yellow pear shaped. Pineapple flavor. Large white flowers. Semi-dwarf. (BR).

CHERRY:

While some Cherry varieties require a pollinator of another Cherry variety, others are self-fertile (indicated below) and can produce plentifully on their own. Self-fertile varieties will produce even more with another variety planted nearby. Combo trees have multiple pollinizers grafted on one tree and are fine as solitary trees.

Approximate mature height: Semi-Dwarf (Mazzard F 12-1) 22-29'; Dwarf (Gisela 5) 12-15'. Mature height can vary with each variety.

- **Bing** Top quality, large juicy and sweet black cherry. July. Dwarf (BR)(C).
- **Lapins** Dark, high quality like Bing with better disease and crack resistance, **self-fertile**. June. Dwarf. (BR)(C)
- **Montmorency** Bright red, soft, juicy, sweet tart pie cherry. **Self-fertile**. July. Dwarf. (BR).
- **Morello** Dark red, productive pie cherry. **Self-fertile**. August. Dwarf. (C).
- **Rainier** Well known Yellow with pink blush, sweet and productive. Late June-early July. Dwarf. (BR)(C)
- **Stella** Red-black, plump, and juicy, disease and crack resistant, productive, and **self-fertile**. June. Dwarf. (C).
- **Sweetheart** Bright red sweet cherry. Late July. **Self-fertile**. Dwarf. (BR).

PLUM:

Like their Cherry relatives, Plums are variable. The Asian Plums (large and round) should be planted with another Asian variety as a pollinizer. European Plums (smaller and oval: often dried to make prunes) are generally self-fertile but will produce more heavily with another European variety nearby.

Approximate mature height: Semi-Dwarf (Marianna 2624) 15-18'; Dwarf (St Julien A) 12-15'. Mature height can vary with each variety.

- **Beauty Asian** red with amber tinged red flesh, juicy and amazing rich flavor, ripens in August. Semi-Dwarf. (BR)(C)

- **Brooks European** dark purple with very sweet yellow flesh, great for eating fresh or making preserves, drying, and canning. August Semi-Dwarf. (BR)(C)
- **Green Gage European** Oval greenish yellow with amber flesh. Sweet, good flavor all purpose. August. Semi-Dwarf. (BR)(C).
- **Italian European** The classic. Medium purplish black, sweet, Great fresh, canned, or dried. Late August. (BR)(C). Dwarf. (BR)(C).
- **Methley Asian** Reddish purple with sweet red flesh. Early August. (C).
- **Shiro Asian** Large round, golden yellow with yellow flesh. Sweet and very juicy. Partially self-fertile. August. Semi-Dwarf. (BR)(C).
- **Yellow Egg European** Large oval, bright yellow with yellow flesh. Good for fresh eating or canning. August. Semi-Dwarf. (BR)(C)

PEACH, NECTARINE and APRICOT:

Also related to Cherries and Plums, Peaches, Apricots and Nectarines are self-fertile. Diseases can be a problem in our area. We carry only varieties known to be disease resistant.

Approximate mature height: Semi-Dwarf (Marianna 2624) 15-18'. Dwarf (St. Julien A) 12-15'. Mature height may vary with each variety.

- **Avalon Pride Peach** Highly flavored, yellow flesh, semi freestone. Curl resistance is good. Semi-Dwarf (C).
- **Frost Peach** Leaf curl resistant. Yellow flesh, freestone. August. Semi-Dwarf (BR)(C). Dwarf (BR).
- **Hardy Red (Hardired) Nectarine** New for NW gardens! Red with gold blush with yellow flesh, very disease resistant, excellent flavor, semi-freestone, August. Semi-Dwarf (BR)(C)
- **Harglow Apricot** Newer disease resistant variety. Medium to large, orange, good for eating fresh. August. Semi-dwarf (BR)(C).
- **Oregon Curl Free Peach** Orange yellow, semi freestone. August. Semi-Dwarf. (C).
- **Redhaven Peach** Freestone, medium, yellow flesh. Great for canning or freezing. Semi-Dwarf. (BR)(C).
- **Salish Summer (Q-18) Peach** This new variety is one of the most reliable for the Pacific Northwest. Leaf curl resistant, white flesh, sweet, juicy, and flavorful, semi-freestone. (C)
- **Wenatchee Moorpark Apricot** Orange/yellow, good producer. Known to do well in our climate. Semi-Dwarf. (BR)

NUT:

Nut trees demand full sun in well drained locations. Nuts ripen in fall.

- **Jefferson Filbert (Hazelnut)** Grows to about 12'. A newer blight immune variety. Large, uniform nuts. Good producer. Plant with Theta as a pollinator. (C).

- **Theta Filbert (Hazelnut)** Grows to about 12'. Features very flavorful, medium-size nuts and immune to Filbert Blight. Plant with Jefferson as a pollinator (C).
- **Cascade English Walnut** Fast growing large tree (30-50') Thin shell, excellent flavor. Somewhat self-fertile. (C).

SPECIALTY:

And a couple of interesting things:

- **Fruit Cocktail** Frost Peach, Puget Gold Apricot, Hardy Red Nectarine, Sweetheart Cherry, Italian Prune, Lapin Cherry. ALL ON ONE TREE! Dwarf. (BR).
- **Sugar Twist Pluerry** Plum and cherry cross. The fruit is the size of a small plum with red skin and yellow flesh red and flavor combination of both plum and cherry. Needs an Asian plum as a pollinizer. (C)

Bayview will also offer a good selection of Figs, Hardy Olives, Persimmons and a full range of fruiting shrubs which will be available variably throughout the Spring.
